Ultherapy[®]
SEE THE BEAUTY OF SOUND[™]
Non-Invasively Lift
the Eyebrow, Neck
and Under-Chin

How Does Ultherapy Work?

Focused ultrasound energy is delivered non-invasively and selectively into the dermal layer as well as the skin's deep support structures without affecting intervening tissue. This is done around the eyes, cheeks, and upper neck.

powered by patients worldwide
VENUS FREEZE

The non-invasive treatment uses Radio Frequency and Cryo-cooled Carbon Dioxide to help lift and firm loose, sagging skin.

RESULTS

With multiple sessions of treatment you can see real, long-lasting results. Some of your visible results may include skin tightening and lifting.

Treatments that are

SAFE

Radio Frequency and Cryo-cooled Carbon Dioxide treatments have been used for many years and are proven safe and effective.

Experience your treatment in

COMFORT

With a cooling gel, the treatment can be performed in a comfortable setting.
